The disclosure is objected to because of the following informalities: The specification should include at least the headings "Brief Description of the Drawings" and "Detailed Description of the Invention".

Appropriate correction is required.

* * * * *

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what is meant by the term "meccano", this does not seem to be an accepted term in the art.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Wengel 3,827,177.

Wengel shows a construction toy including connective parts 2 and polygonal panels, the connective parts having a base and elastic fingers extending at fixed angles, and the polygonal panels having edge recesses 11 to receive the connective parts.
